Agency	Department of State
DoS Office	N/A
Post	NIAMEY
Section	PAS
Number of Interns	2

Project Description

Nigeriens are eager to participate in an American education. We are seeking interns who can connect with motivated students who want to study in the U.S. You will serve as a mentor, assisting with questions related to the SAT and TOEFL exams, as well as developing materials that will introduce students to U.S. education. Working with our staff, you will begin by developing your outreach and communication plan, detailing how, what and when you will communicate with the students. For example, you can develop a program on selecting and college, and set up SKYPE sessions, webinars or other communications through a social media platform (we need updating of our Facebook page). We envision monthly sessions in addition to the ongoing communications you establish through social media, etc. This is your opportunity to mentor others and directly change a life forever, assisting young people in securing the education opportunity they desire.

Desired Skills Interests

Additional Information

We are looking for a self-starter with a passion for education and sharing knowledge; organizational,

communication (social media) and research skills are also important. Must be a confident French speaker.
